	pack of 500	£23.23

### Instructions

Select a suitable heat resistant container i.e. china, stone, plaster, glass

Just pour in the natural wax crystals

Tap container slightly so the wax crystals can settle close together in the container

Put the wick into the crystals using the metal bit on the bottom to help push down

Push the wax crystals back around the wick

Have at least 1.5 cm of wick showing at the top

When placing your wick in the wax crystals make sure that the wick is at least 3 cms away from the edge of the container

If you're using a large container you can add multiple wicks for a wonderful display

Make sure that wicks are at least 6 cms away from each other or you'll have a pond instead of a puddle of wax!

Light the wick and enjoy your very own candle!

If you'd like your candle fragranced, add a drop of suitable fragrance or pure essential oil to the shimmering natural wax crystals and mix it well in before adding the wick

Do not add when alight or place fragrance next to the wick

After the wick has burnt away, wait for the wax around it to go cold and solid

Remove the metal bit of the wick and the solid wax around it and discard

Top up with fresh wax crystals if needed and add a new wick and off you go again!

If you've got a tall container you can fill the bottom half with water and add some decorations. Then fill the top half with the wax crystals. Cut the metal base off the wick; insert the wick into the wax. Make sure you don't push it down into the water

## PMC – Precious Metal Clay

An easy way to produce unique solid, hallmarkable '999' silver - a higher Silver content than UK Sterling Silver, to make jewellery & gifts. A unique product, fast & easy to use. Looks & feels like ordinary clay. Water & a non-toxic organic binder are mixed with fine particles of silver. Producing a material that can be used just like clay - rolled, stretched, cast & thrown on a wheel! You 'fire' it with the hand held torch or kiln; the water & binder disappear - brush it & you're left with a unique piece of silver.

**Discounts available on multiple quantities of PMC when ordering on line.**

## Fimo Polymer Clay

FIMO by Eberhard Faber, is a world leading brand for oven drying modelling compounds. FIMO SOFT is a new and more developed quality, easy to knead and is quickly ready for modelling.

Versatile, easy-to-handle polymer clay which hardens in your kitchen oven. Brilliant colour intensity, fade proof & odourless. Any shade can be achieved by kneading basic colours together. White Fimo Soft lightens individual colours. Transparent Fimo Soft gives a translucent quality. After modelling place the object in a preheated kitchen oven set at 265 degrees F (129 degrees C) maximum for 10-20 minutes.

### Magickal Pentagrams

The Pentagram is a 5-pointed star representing the four elements of Earth, Air, Fire and Water surmounted by the Spirit. It is inscribed in the Air by western Magicians and Witches during the ritual creation and cleansing of elemental energy within the magickal circle and is also used for protection and purification by practitioners of High Magick in the Banishing Ritual of the Lesser Pentagram. All Pentagrams in this range are made from silver and/or gold plated lead free pewter and embellished with Swarovski Crystals. Supplied on a chain in presentation box.
